

Verified Impact NFTs Part 2

Milestone 1 - Add Media

Version 1.0

Details of what will be delivered in milestone

We need to have an introduction media created for the project which will include an article and video.

Introduction Article

Create an article describing how to use the platform and the process by which it does secure the NFTs. This is an important aspect to help user awareness.

Introduction Video

A small 60-second video that shows how the platform will operate in action.

Acceptance criteria:

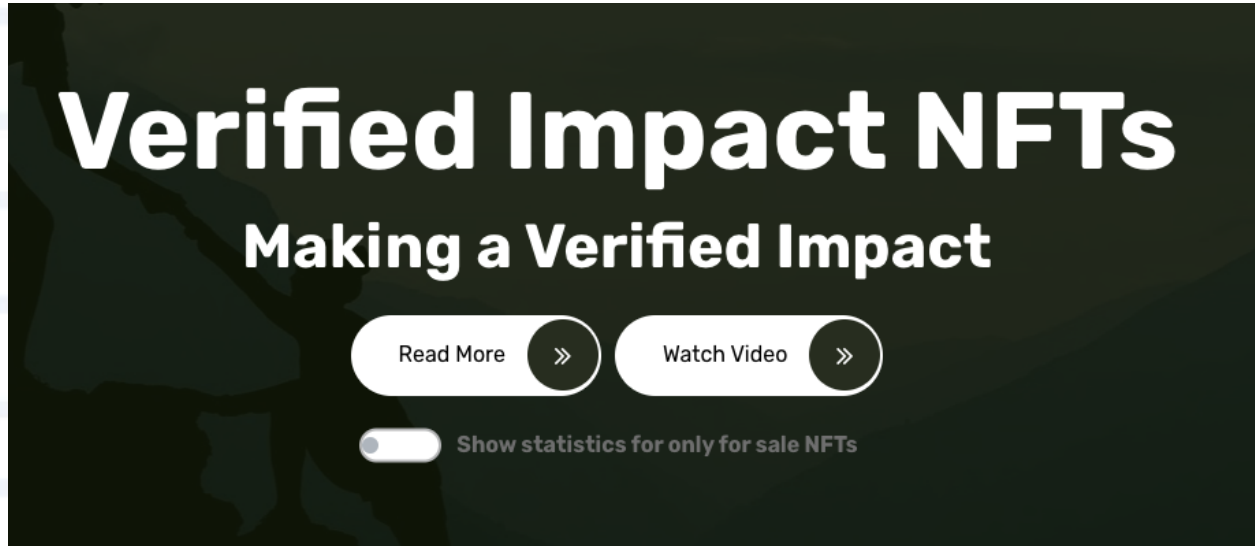

- A Link to Medium article

<https://medium.com/@verifiedimpactnfts/getting-impact-to-where-its-intended-1f3baf94244>

- A link to 60 second video

https://drive.google.com/file/d/1e1DZiHBdwOISMh7nW9pTBYLzSJQ60awF/view?usp=share_link

- Update the site with those two links

Beneficiary

How Does it work?

First, sign up to become a beneficiary on the platform.

An email will ask you for your documentations as part of the KYB (Know your beneficiary) process.

Once active, you will be able to create unlimited campaigns, each with its own incentives and wallet account.

Setting up a campaign

Campaigns are easy, you will need to give it a catching name and a description, select the SDGs (UN sustainable development goals) it serves and a picture.

You may want to consider providing an incentive to the creators. The incentive is the percentage you are willing to share with the NFT creator once it is sold.

Obviously, the higher the incentive, the more likely more artists will join your campaign.

That's it!

Where are the NFTs coming from?

Creators that like your campaign can join it and create NFTs to be sold for your cause.
This is how the art community helps provide an impact.

Setting up a collection

Collections are easy, just enter the name and description of your collection.

Minting NFTs

Unlike all other platforms, Verified Impact NFTs starts by selecting the beneficiary and the campaign you like to support. This will show you what SDGs (UN sustainable development goals) you are supporting with your work as well as the incentivization percentage you will get when the NFT is sold.

That's it!

What are the campaigns?

This is the best part!

Campaigns are created by verified beneficiaries to help with SDG causes all over the glob. It is an easy way to use your art for good!

How Does it work?

Imagine an NFT platform completely dedicated to the United Nations Sustainable Development Goals! Where all the beneficiaries are verified, with a multitude of campaigns serving every potential cause.

Dozens of artists creating beautiful, one of a kind digital assets as a token of appreciation for your contribution. Those assets take a life of their own and may become of much different value over the years.

The best part is that you do not have to choose between owning a digital asset or getting a tax deductible receipt!

you can have both
